

Dear Mr. Mustermann,

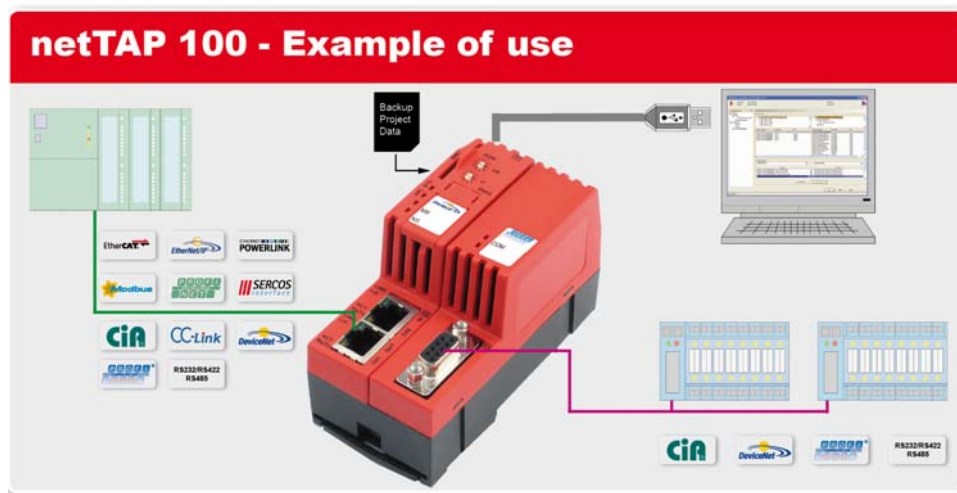

Hilscher GmbH has been operating successfully with a Representative Office in the Chinese market for three years and since July 2009 has taken the next step to an authorized Trading Company. Initially a reliable „agent“ was necessary to carry out business transactions between Germany and China.

Hilscher netTAP 100 – Industry’s most flexible Gateway for Fieldbus, Real-Time-Ethernet and serial protocols

Hilscher netTAP 100 is similar to an „agent“ as well, which connects two different industrial networks quickly and reliably whether Fieldbus, Real-Time-Ethernet or serial protocols.

Now available:

- Program your own serial protocols with netSCRIPT.
- Currently more than 60 protocol conversions available.

Highlights

- **Avoid connection barriers** with many potential protocol combinations:
 - o Fieldbus to Fieldbus / Real-Time-Ethernet
 - o Serial to Fieldbus / Real-Time-Ethernet
- **Full flexibility**, switch Real-Time-Ethernet protocols via loadable firmware and determine Master or Slave functionality with optional Master licence code.
- **Program own serial protocols** with netSCRIPT.
- **Reduce storage costs**, one single hardware enables multiple conversions.
- **Minimize installation errors**, configuration and project data can be copied easily to other netTAP 100 via memory card.
- **Protect Investments** by integrating existing devices in modernized facilities.
- **Time is money**: easy configuration and no programming necessary. Complete software package included in delivery.

[See more information about Hilscher netTAP 100 on the Internet.](#)

Hilscher Product Portfolio:

PC cards, OEM modules, Gateways, ASICs, as well as engineering services
e.g. FDT/DTM development service, netX design in & production service
