

Dear Mr. Mustermann,

The Hannover Fair 2010 ended just a few weeks ago and despite the international flight chaos Hilscher draws a very positive conclusion of this year's HMI presence. On an exhibition space of more than 160m² Hilscher presented amongst other devices the new netLINK SCADA, putting Hilscher's technical advantage through innovative and customer-oriented products to the test.

Hilscher netLINK SCADA – Web visualization plug for SIMATIC-S7®

The netLINK SCADA visualizes your S7® process data online via PC or any web-enabled device. Simply plug it on the MPI or PROFIBUS interface of the PLC and establish connection to the existing corporate network through the Ethernet port. With a free web browser for example Internet Explorer, you can graphically display your data easily, anywhere and at any time.

*SCADA – Supervisory Control And Data Acquisition

Highlights

- **Flexible visualization** of S7® process data with a standard web browser via PC or any web-enabled device such as iPhone
- **User-friendly visualization software atvise® by CERTEC**, create your entire visualization in only five steps. Import S7® project files and easily create HTML web pages per drag & drop
- **Impressive degree of detail**, supports high-resolution vector graphics instead of conventional bit-mapped graphics
- **Excellent price**, complete web-based visualization system including run-time license
- **Quick and easy setup** through a seamless integration into the SIMATIC-S7® world (MPI or PROFIBUS interface). See for yourself by downloading this [short video tutorial](#).
