

Dear Mr. Mustermann,

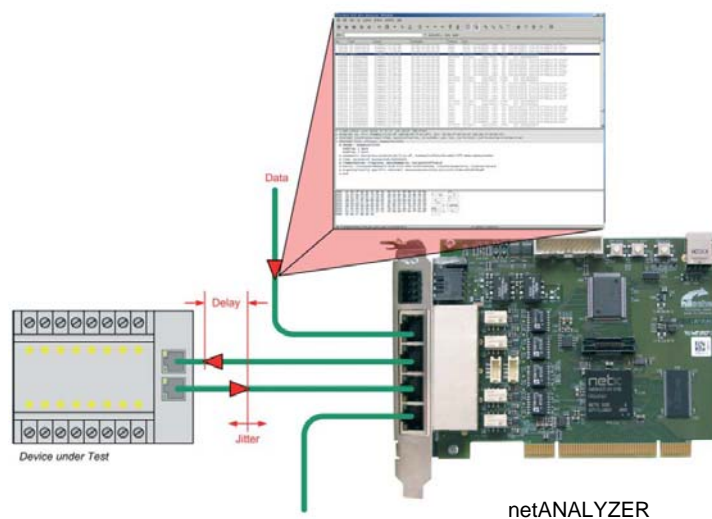

The international trade fair for robotics and automation “AUTOMATICA” in Munich ended just recently and Hilscher draws a positive conclusion from its first participation at this fair. Hilscher’s cutting-edge products from Gateways to PLCs caused great attention among the visitors. In the current issue of the e-Newsletter Hilscher introduces a powerful network analyser due to the high demand.

### Hilscher netANALYZER – Quick and reliable troubleshooting of Real-Time-Ethernet Systems

The netANALYZER is used for analyzing and optimizing the communication in Real-Time-Ethernet networks. This allows you to monitor the network continuously, detect errors in advance and optimize data throughput.

#### More news:

- Hilscher is officially CC-LINK 2.0 certified
- CC-LINK Slave is now available on industry’s most flexible Gateway netTAP100

#### Highlights

- **Increased plant availability** through preventive maintenance to avoid downtime
- **Optimized bus communication**, 4 channels to measure delay and jitter
- **Measure data with own application** with open API
- **High accuracy**, time stamp for Ethernet frames with 10ns resolution
- **Continuous monitoring**, store the data in ring buffer or sequentially (up to 1GByte per file)
- Available as PC Card, stand-alone box, or as complete evaluation system Real-Time-Ethernet Kit

netANALYZER PCI card:  
NANL-C100-RE

netANALYZER stand-alone box:  
NANL-B500-RE

Complete evaluation system:  
Real-Time-Ethernet Kit

[See more information about Hilscher netANALYZER on the Internet](#)

**Hilscher Product Portfolio:**

PC cards, OEM modules, Gateways, ASICs, as well as engineering services  
e.g. FDT/DTM development service, netX design in & production service.
